

Page Branching for Confluence

Page Branching for Confluence是一个帮助您管理Confluence空间中页面版本的应用程序。

您可以将页面的草稿存储到分支中，无需更改原始页面即可对其进行修改。一旦您在分支上的工作完成，准备发布，您就可以将其合并到原始页面，该页面将应用分支中的所有更改

您可以为每个页面创建任意数量的分支，并随时合并或删除它们

The screenshot shows the Confluence user interface. At the top is a navigation bar with 'Blogs', 'Calendars', 'Create', and a menu icon. Below this is a breadcrumb trail: 'Dashboard / Product Documentation / Branches'. The main heading is 'Branch v2.0: Getting started'. Below the heading, it says 'Created by Administrator a minute ago' and 'This is branch Branch v2.0 of page: Getting started'. A green tip box says 'Here are some tips to get you started. You can edit this page to...'. The content is organized into three numbered sections: '1. Create a page', '2. Add to your page', and '3. Organize your pages'. An 'Update available' modal is overlaid on the right side of the page. The modal has a red exclamation mark icon and the text 'Update available'. It says 'There are changes in the original page that can be integrated into this branch.' and provides two buttons: 'Update' (with a downward arrow) and 'Merge' (with an upward arrow). Below the buttons is a link 'Go to original page'.
